# Automation Solutions

Since our beginnings in the year 2000 we acquired experience in the industry offering services to different industrial sectors with needs to increase productivity and reduce COSTS by automation and industrial control in their manufacturing processes.

In Grupo Industriales ERCAM we seek to exceed the expectations of our customers from design to delivery, through the experience of our team of technicians and engineers specialized in mechanical design tasks, programming, manufacturing and installation of equipment with systems based on PLC, advanced sensors, drivers, networks and buses, HMI, instrumentation and mechatronics.

## Quality Politics

ERCAM designs, manufactures and supplies machining products as well as industrial automation and control systems for production processes. Our commitment is to fulfill the standards of our clients and the organization in the time and quality established through the implementation of the Quality Management System, which we are continuously improving through the participation of our team

18  
18 YEARS OF EXPERIENCE

## Services

### ■ Manufacturing of mechanics parts.

- Fixtures.
- Parts.
- Solder pallets.
- Pneumatic devices.
- Go-nogo.
- Poka-yoke.

### ■ Mechanical design and automation.

- Sensors, pneumatic, hydraulic and electric devices.
- Control Systems (Analog and Digital).
- Vision systems (Quality, measurement, safety).
- Servomotors mechanisms.
- Design, development of workstations and conveyor systems.

### ■ Training and technical advice.

### ■ Other Services.

- Stainless steel and carbon steel manufacture.
- Storage tanks.
- Aluminum welding.
